Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: please replace the term "taped" with "tape". Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 – 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claims 1 – 7 use the terms "warp" and "filling". The proper terms for knitted fabrics are "wale" and "course". Please replace each occurrence of "warp" with "wale" and "filling" with "course".
5. The term "type" in claim 1 is a relative term which renders the claim indefinite. The term "type" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. For the purpose of examination, the Examiner will interpret "crochet-type" to be synonymous with knitting.
6. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1 – 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsumoto (EP 808950 A1).

As to claims 1, 4 and 8, Matsumoto teaches a truss type steric structure warp knit (column 5, lines 23 – 27). The warp knit is knitted by a double raschel machine having two rows of needle bases and comprises the front and back fabric portions (3) and (4) knitted by chain knitting yarns and insertion yarns (column 5, lines 45 – 50). See Figure 1. The front fabric (3) portion is equated to Applicant's "patterned fabric layer" or "technical back". The back fabric (4) portion is equated to Applicant's "base fabric layer" or "technical face".

As to claim 2, Matsumoto teaches that the double-knitted fabric can comprise, for example, 9 courses (see Figure 4).

As to claim 3, Matsumoto teaches that at least two base courses traverse the full widthwise extent of the tape (see courses 8 and 9 in Figure 4) and at least two pattern courses traverse relative to one another to form a pattern (see courses 5 – 6 in Figure 4).

As to claim 5, Matsumoto teaches that the two-layer knitted structure contains multiple yarns which serve to create patterns or a base using opposing courses (see Figures 1 - 4).

As to claim 6, Matsumoto teaches that the base courses traverse in opposing mirror-image relation and pattern courses traverse in opposing mirror-image relation (see Figure 5).

As to claim 7, Matsumoto teaches that the front fabric portion, or "patterned fabric layer", has a diamond pattern (see Figure 1).
